Set in A. D. 2050, the fragile plot revolves around the threat posed by the Terror Cubes (or *terroremkubikos*, for students of dialect) to civilisation. The Renegade Robots (RR in textual mnemonic) have penetrated the defenses of Lonyork. England's linear city, with a devilishly cunning expanding crystal, which threatens to destroy everything in its path. Will the antidote be found in time? Will Robodog become a bigger household name than Lassie? Enjoyable predictable with everybody saved to continue their search for a computerised Utopia. Slight misgivings though about the penny philosophies injected by Granville Wilson, unnecessary surely for a pre-teen audience.
